Attachment to Notice of Allowability

1. The amendment filed 11/8/2007 is approved for entry.
2. The following is noted with respect to US 7,223,828. The prior obviousness-type double patenting rejection did not include instant claims 52-63 because the instant claims require a melting point $\geq 165^{\circ}\text{C}$ and a branching index of less than 1.0. In contrast, the patented claims require a branching index ≤ 0.95 , at least two different diene comonomers, and either an unspecified melting point (claim 1) or a melting point $\geq 160^{\circ}\text{C}$ (claim 16). The instant claims are not deemed to be obvious over the patented claims because the patented specification does not disclose a melting point of $\geq 165^{\circ}\text{C}$. Furthermore, a branching index of ≤ 0.95 and a required second comonomer would be expected to reduce the crystallinity and the melting point, and therefore it cannot be concluded that obtaining a polymer having a melting point $\geq 165^{\circ}\text{C}$ as required in the instant claims would even be possible within the limitations of the patented claims.
3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:00 - 4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
